P3 2025-11-21 Replace the 3 switches in production (ID:41)

21/11/25 Spoke with Suant who has some Cisco IOS knowledge. Suggested using the 2960 POE switch from the lab.

Only needs a small not manage POE switch in the lab

cohda-41.txt - P3 2025-11-21 Replace the 3 switches in production (ID:41)

21/11/25

=====

There are 3 switches in the production area - A Netgear Prosafe GS510TP, a 5 port TP-Link, and a D-link 8 port switch with 2 x PoE ports.

Spoke with Suant. He is happy to move the 2960 PoE switch from the production fishbowl area to where the 2 x production PC's are located. He just needs a couple of PoE ports in the fishbowl are. Can use the D-link for this.
