04/02/26

=====

14:51 Email from Matt to Thomas & myself asking if we know why Jenkins-Docker-2004gh was offline.

15:05 Email from Thomas advising "gh" means it was supposed to be a temporary VM just for the github transition.

15:06 Email from Thomas confirming it was baremetal and that it was probably in the server room sulking after last power hiccup.

15:26 Email from Matt confirm it was baremetal and that it periodically needs a kick after going off line

15:47 Email from Thomas asking if it is back.

15:51 Email form Thomas with Cacti output shoing it has been down for 5 days

04/02/26

=====

09:48 Email from Matthew to Deepak, Wade, Paul, cc Russell & Matthew Mulders asking if they knew where the machine was physically located.

12:23 Email to Matthew asking who has rebooted the server in the past and if he could provide anymore detail. le Machine name and what it looked like. le desktop/laptop.

12:31 Email from Matthew responding - Thomas has rebooted September 2025 and that it was a real machine. Physicly located CW088 in the server room. Put additional identifying labels on it and documented in CohdalT.chm -> Hardware -> Misc -> CW088 - jenins-docker-2004gh.

16:18 Email to Matthew advising CW088 has now been labelled "Jenkins-Docker-2004hg"

18:02 Ticket CREATED.

19:36 Ticket COMPLETED.
